

Tiny teddy racing cars

Fun size chocolates (Mars bars or Milky Ways)

Smarties

Musk Life Savers

Tiny Teddies

Small quantity of chocolate icing (or a chocolate icing pen)

Lay out all of your ingredients. Cut your musk lollies in half & chop the legs off the Tiny Teddies (apologising to each one of course).

If you are using homemade icing you can make your own piping bag by putting it in a Ziplock bag and snipping the corner edge. Pipe a dollop of icing onto each Smartie.

Glue the Smarties onto the side of each chocolate bar. Put a little dollop of icing on the ends of the musk lollies and stick your steering wheels on the front of the cars. Lastly put a little icing on the cut ends of the Tiny Teddies and put the drivers behind the steering wheels. You might need to push the teddies down into the chocolate bar, but don't push too hard or you'll end up with smashed cars. Refrigerate to set the icing.
